

Foam Bucket Cushion (makes 9 or 10)

Needed:

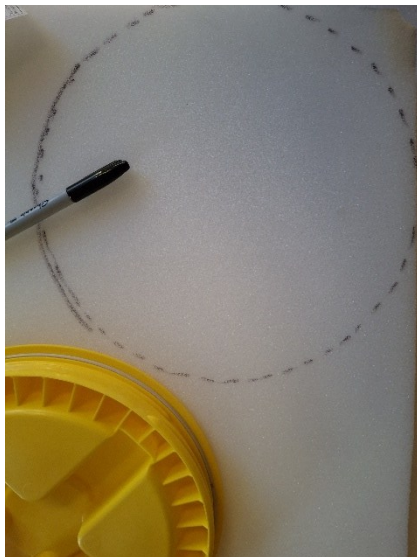

- Foam* - Cut 9 or 10, 11" diameter circles
- Fabric – 3 ⅓ yards to cover foam – (assume regular bolt 44"-45" wide)
- Backing – 9 or 10 Felt sheets (9" X 12") or about 1 ¼ yards of fabric
- Spray Adhesive *
- Scissors or Utility Knife to cut foam and fabric

*Foam is provided. The stake has cans of spray adhesive to share between families.
Contact jensentrek2026@gmail.com to coordinate.

1. Cut out foam circles from sheet of foam provided
2. Cut fabric into 22" x 24" rectangular pieces. Trim off corners (see photo)
3. For backing, cut approximately a 9" diameter circle.
4. Lay foam circle centered on the back side of the fabric.
5. Spray the adhesive on the top of the foam, covering the outer approximately 3 inches.
Pull fabric up around the edges of the foam and press edges on top of the adhesive.
6. Use the spray adhesive to attach the backing circle.

Tips

- Spray the adhesive outdoors.
- Clean nozzle by spraying the can upside-down when done.
- Paint thinner can be used to clean up the glue if necessary

Step 1 – Cut 9 or 10 circles that are 11" in diameter out of the foam sheets.

Step 2 - Cut fabric into 22" x 24" rectangular pieces. Trim off corners (make 9 or 10)

Step 3 - Cut 9" diameter circles from felt squares or any fabric.(make 9 or 10)

Step 4 - Lay foam circle centered on the backside of fabric

Step 5 - Spray the adhesive on the top of the foam, covering the outer approximately 3 inches. Pull fabric up around the edges of the foam and press edges on top of the adhesive.

Step 6 - Use the spray adhesive to attach the backing circle. Let dry. The cushion can be left removable and fit inside the bucket for storing or could be attached with a glue gun to the top of the lid.
